SUMMARY

Software Developer with hands-on experience in Python, Django, Django REST Framework (DRF), REST APIs, HTML, CSS, JavaScript, Angular, and SQL. Skilled in developing responsive and scalable web applications, building and integrating RESTful APIs, managing databases, and writing clean, maintainable code. Strong problem-solving skills and a passion for creating efficient, user-friendly software solutions. Eager to contribute to a dynamic development team while continuously learning and growing as a Software Developer.

EDUCATION

Sri Ramakrishna Engineering College

Bachelor of Information Technology & Engineering

- 68.1%

Nov 2021 – May 2025

Coimbatore, Tamil Nadu

Syed Ammal Matric Boys Higher Secondary School

HSC & SSLC

- 83.8% in HSC
- 79% in SSLC

June 2018 – May 2021

Ramanathapuram, Tamil Nadu

SKILLS & INTERESTS

Programming languages: Python, JavaScript, Sql

Data Analysis And Visualization: NumPy, Pandas, Matplotlib, Seaborn

Backend: Django, REST API, Authentication, CRUD Operations

Frontend: HTML, CSS, Bootstrap, JavaScript, Angular

Databases: MySQL

Tools: Git, GitHub, VS Code, Google Colab, PyCharm, MS Office

PROJECTS

SmartTrips

- AI-powered travel planner that creates personalized trip itineraries based on user preferences, budget, duration, and group size, helping save planning time while ensuring optimized, cost-effective, and efficient travel experiences.
- Developed a scalable web application using modern frontend technologies with seamless API integration and dynamic content rendering.
- GitHub Link:** [SmartTrips](#)

Diseases Prediction using Symptoms

- Predicts possible diseases based on user-entered symptoms using machine learning models trained on medical datasets to enable early diagnosis and suggest probable conditions.
- Suggests precautionary measures and recommends consulting a healthcare professional based on the predicted disease.
- GitHub Link:** [Diseases Prediction using Symptoms](#)

Face Emotion Recognition

- Face Emotion Recognition is an AI technique that detects human facial expressions (happy, sad, angry, etc.) from images or videos using machine learning or deep learning models.
- Applied image preprocessing and feature extraction techniques to enhance the performance of the emotion recognition models.
