SUMMARY

Python and React Developer with hands-on experience in Python, Django, Django REST Framework (DRF), REST APIs, JavaScript, React, HTML, CSS, and MySQL. Skilled in developing responsive web applications, building RESTful APIs, implementing CRUD operations and authentication, integrating frontend applications with backend services, and managing relational databases. Strong understanding of component-based UI development, API integration, and clean, maintainable code. Eager to contribute to a development team as a Python/React Developer and build scalable, user-friendly web applications.

EDUCATION

Sri Ramakrishna Engineering College

Bachelor of Information Technology & Engineering

Nov 2021 – May 2025

Coimbatore, Tamil Nadu

– CGPA/Percentage: 68.1%

Syed Ammal Matric Boys Higher Secondary School

HSC & SSLC

June 2018 – May 2021

Ramanathapuram, Tamil Nadu

– HSC: 83.8% — SSLC: 79%

SKILLS

Languages: Python, JavaScript, SQL

Frontend: HTML, CSS, Bootstrap, React, Angular

Backend: Django, Node.js, Express.js, REST API

Database: MySQL, MongoDB

Libraries: NumPy, Pandas, Matplotlib, Seaborn

Tools: Git, GitHub, VS Code, PyCharm, Google Colab

INTERNSHIP

TechPro Solutions

Web Development Intern – Remote

June 2024 – July 2024

Coimbatore, Tamil Nadu

Developed 5+ responsive web pages using HTML, CSS, and JavaScript, connected a MySQL database and implemented CRUD operations, while using Git for version control and supporting deployment testing.

CERTIFICATIONS & TRAINING

Python Full Stack Development Course – QSpiders, Velachery

Completed Python Full Stack Development training with hands-on learning in HTML, CSS, JavaScript, Python, Django, SQL, React, REST APIs, database management, CRUD operations, and frontend and backend integration.

PROJECTS

SmartTrips

AI-powered travel planner that generates personalized itineraries based on budget, duration, preferences, and group size with API integration and dynamic content rendering.

Technologies: React, Vite, Auth0, Firestore, Gemini AI, Places APIs

Diseases Prediction using Symptoms

Machine learning application that predicts possible diseases from user entered symptoms and provides precautionary suggestions based on the predicted diseases.

Technologies: Python, Django, Pandas, Numpy, Scikit-learn, REST API

Face Emotion Recognition

Developed an AI based application to recognize facial emotions from images or videos using image preprocessing and feature extraction techniques.

Technologies: Python, Flask, PyTorch, OpenCV, Numpy, REST API
