SUMMARY

Enthusiastic and creative Full Stack Developer with a strong foundation in front-end and back-end technologies, including HTML, CSS, JavaScript, Python, and database management. Passionate about building clean, efficient, and user-focused applications while improving performance, usability, and scalability. Motivated to contribute to a dynamic development team and grow through real-time full-stack development experience.

EDUCATION

Sri Ramakrishna Engineering College

Bachelor of Information Technology & Engineering

- 68.1%

Nov 2021 – May 2025

Coimbatore, Tamil Nadu

Syed Ammal Matric Boys Higher Secondary School

HSC & SSLC

- 83.8% in HSC
- 79% in SSLC

June 2018 – May 2021

Ramanathapuram, Tamil Nadu

SKILLS & INTERESTS

Frontend: HTML, CSS3, JavaScript, React.js

Backend: Python, Django, REST APIs

Databases: MongoDB, MySQL

Tools: VS Code, Anaconda, Google Colab, PyCharm, MS Office Version Control: Git, GitHub

Interests: UI Design, Problem Solving, Learning New Tech, Research

INTERNSHIPS

TechPro Solutions

Web Development Intern – Remote

- Designed 5+ responsive pages using HTML, CSS (Flexbox/Grid), and JS.
- IConnected MySQL database for dynamic content (CRUD operations).
- Used Git for version control and assisted in deployment testing.

June 2024 - July 2024

Coimbatore, Tamil Nadu

PROJECTS

Diseases Prediction using Symptoms

- Predicts possible diseases based on user-entered symptoms using machine learning models trained on medical datasets to enable early diagnosis and suggest probable conditions.
- Tech:** Python, Scikit-Learn, Pandas
- GitHub Link:** [Diseases Prediction using Symptoms](#)

SmartTrips

- AI-powered travel planner that creates personalized trip itineraries based on user preferences, budget, duration, and group size, helping save planning time while ensuring optimized, cost-effective, and efficient travel experiences.
- Tech:** HTML, CSS, JavaScript, APIs
- Github Link:** [SmartTrips](#)

Face Emotion Recognition

- Face Emotion Recognition is an AI technique that detects human facial expressions (like happy, sad, angry) from images or videos using machine learning or deep learning. It helps computers understand human emotions for applications like security, healthcare, and interactive systems.
- Tech:** Torch, Facial Emotion Recognition
- Github Link:** [Face Emotion Recognition](#)
